## **PRODUCT DESCRIPTION**

The example above shows a Britannia Park gate made of Cedar with a Convex Scallop and Semi-Transparent stain at 3" spacing. This particular photo shows a great view of how the overhead brace can make a gate stand out from the rest of the fence.

"Convex" refers to the shape of the curve on top of the fence. If the the arc is higher in the center than at the posts it's convex. If the arc is lower in the center than at the posts it's concave.

Standard Wood Gates are priced at twice the price per foot of the matching fence style. For example, if a fence style is \$80/ft a matching gate will start at \$160/ft.
