## **PRODUCT DESCRIPTION**

The example above shows an Osgoode (Concave) Gate made of Cedar. This particular photo shows a gate that is only 4' high so an overhead brace is not necessary for support.

"Concave" refers to the shape of the curve on top of the gate. If the the arc is lower in the center than at the posts it's concave. If the arc is higher in the center than at the posts it's convex.

Standard Wood Gates are priced at twice the price per foot of the matching fence style. For example, if a fence style is \$80/ft a matching gate will start at \$160/ft.
